

PGS INTERNATIONAL
Solutions™

FIELD SERVICES

Lifecycle RESPONSABILITY

PGS takes responsibility of your assets from "start to finish", leaving with your practical O&M solutions that cater for instrumentation control and electrical systems.

Our lifecycle responsibility assures plant availability, performance, quality and safety to meet your enterprise goals.

This value commitment is a key attribute that continues long after the project is completed and promises a trusted performance based relationship with all our customers.

Site survey

To accurately understand the real site layout, conditions and constraints, PGS engineers perform on site visits and use collected information to optimize project engineering and execution.

FAT and Precommissioning services

Software and optimization solutions for control systems which include:

- Alarms optimization and PID loop optimization.
- Process optimization including well tests , gas lift optimization and stream generation.
- Audit and software solutions for oil and gas applications.
- Customized reporting solutions.

In house testing and verification

After the construction and the assembly of a project, we invite our customers to PGS workshops to witness a performance test and ensure that the system meets the required specifications.

Trouble shooting and repairing

PGS engineers provide an accurate diagnostic, troubleshooting and repairs necessary to get your system up and running again.

Commissioning and Start-up assistance

Our experienced engineers and technicians can fill all your instrumentation, Process control / Safety Instrumented system and electrical commissioning needs PGS ensures that you get :

- Turnkey project management , execution and control.
- Through site surveys and documentation review.
- Perfect work execution from beginning to end.
- Safe, reliable and efficient operation of systems.
- Management of safety.

Maintenance services

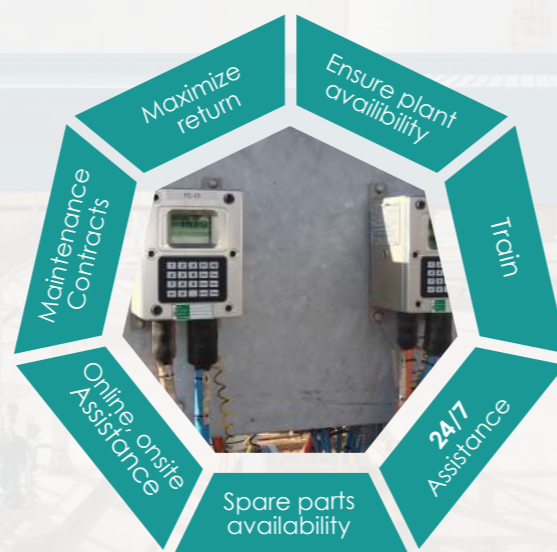

- Preventive maintenance.
- Breakdown maintenance.
- Reliability centered maintenance.
- Surveying , reporting and analysis.
- Start -Up /Shutdown Services.
- Reporting and Analyses.
- Calibration , Audits and Compliance.
- Maintenance Management and Planning services.

Spare parts

To keep your equipment, machines and systems operating reliably and efficiently we offer original spare parts and help you maintain a continuous operation.

Training

We provide our customers with high-quality training which is fundamental to fully exploit the systems and get the optimum performance.

What differentiates PGS ?

- Multinational team.
- Local presence and global reach.
- Multi-dimensional experience of projects design, commissioning and maintenance services.
- Expertise in multiple systems and environments.
- TUV FSE /ISA PMP / certified engineers.
