Chemical Injection Skids

Customer : SAFIR  
Industry : Upstream Oil & gas  
Order date : 2022  
Completion : 2023

## Executive summary

This project was granted to PGS for the provision of corrosion inhibitor systems destined to be installed in the oil wells of TOUAT 2 field in Algeria. After the approval of the engineering phase with the client, PGS carried out the material procurement followed by the fabrication and assembly in our workshops.

Once the skids assembled, the customer was invited to conduct the Factory acceptance test and the FAT report was signed with no reservation.

The skids were shipped in the contractual deadline. Hence, our project management team succeeded to deliver one more project in compliance with our customer's technical requirements and deadlines.

Our operation team is ready to be notified in order to assist the customer in the installation and commissioning of the skids followed by the provision of specific training session.

## Project Overview

### Scope of supply :

- 24 Hydrate and corrosion inhibitor skids
- 24 Storage systems
- 01 Set of calibrated instruments for each skid
- 01 Set of electrical cables for each skid
- 01 Control panel for each skid
- Spare parts for 2 years operation including mechanical, electrical equipment, lubricants and chemicals

### Scope of services :

- Engineering
- Management
- Fabrication and assembly
- Installation assistance
- Startup assistance
- Customer's training

## Key achievements

As an expert in designing and manufacturing turnkey packages, PGS was capable of delivering an integrated project that included both process and a control system taking in consideration the HSE aspects.

PGS successfully delivered the project within the contractual delivery terms and budget. Our valuable customer has benefited from a fully automation process package which allows them to operate their upstream activity with more performance and efficiency.

## Customer satisfaction

The customer has recognized that PGS International has undertaken its responsibilities in a professional manner and implemented its best efforts at all times to maintain the project interests and to secure timely completion and safe works performance.
