SUCCESS
STORY

Construction of an
Oil Terminal at Jorf Lasfar

Customer : WINXO GROUP
Industry : Oil & gas storage and distribution
Order date : 2021
Completion : 2022

Executive summary

In the scope of the construction of one of the largest oil terminals in the world with a storage capacity of 600 000 m³, PGS has been awarded a turnkey project consisting in the supply, fabrication, mounting, installation, automation, integration and commissioning of truck loading stations along with Automatic Tank Gauging for Winoil Terminals at Jorf Lasfer in Morocco.

PGS carried out the engineering phase of the loading skids, the additive injection skids and the safety and control cabinets.

Once this phase has been approved, the procurement phase was initiated, followed by fabrication and assembly works, and achieved by notifying the customer to attend the factory acceptance tests, which has been successfully performed and the products ready to be shipped.

PGS Field services team completed the mechanical and commissioning services and connected the products to the existing facilities awaiting the startup of the terminal.

Project Overview
