

WORKSHOP EL MGHIRA

PGS INTERNATIONAL

Local : El Mghira Industrial Zone
Close to the port area

Mission : Structure piping, SS/CS
tanks & Skids...

Manpower : 20 Employees

Mechanical Assembly : 3000 m²

16 YEARS OF EXPERIENCE

Who are we ?

PGS, a company with more than 70 specialists in the manufacturing and assembly of production processes in the oil, gas and chemical industries to efficient production of high-quality products.

Our knowledge and decades of experience are the basis for high-quality products conforming to international standards such as ASTM and DIN.

Technical support

Our technical support services put you in direct contact with a team of engineers who are experienced in both design, manufacturing and erection.

Areas of activities

We support you throughout the entire manufacturing activities :

- Technical support
- Mechanical welded Work
- Storage tanks and Pressure Vessel works
- Piping Works
- Stainless Steel Work
- Transformation of metals Work
- Mechanical assembly Work
- Electrical assembly Work
- Instrumentation assembly Work
- FAT (Factory Acceptance Test)

Mechanical welded Work

PGS offers you all type of common methods of Welding:

- Shielded Metal Arc Welding
- Gas Tungsten Arc Welding
- Gas Metal Arc Welding
- Flux-Cored Arc Welding

Storage tanks and Pressure Vessel works

PGS is a leader in the production of steel storage tanks and pressure vessels. The combination of highest quality and competitive prices make that we have established an impressive customer base including most major oil & gas companies and industrial companies.

Piping work

PGS designed and manufacture several different pipes for the safe transportation of hazardous liquids.

- Pipes used for petrochemical transport
- Pipes used for liquid/gas phase mixtures
- Pipes used for water application
- Pipes used for transportation of crude oil and wet/sour gas.

Stainless Steel Work

We can manufacture a complete package of Design, fabrication and installation of Stainless Steel equipment's :

- Stainless steel tanks
- Stainless steel pipes
- Super Duplex pipes
- Strainers

Mechanical, electrical and Instrumentation Assembly Work

PGS is here to meet all your electro-mechanical assembly needs. We support a wide variety of mechanical and electrical assemblies. Our plant floor is capable of producing mechanical, electrical and instrumentation assembly work.

Transformation of metals Work

The machine park is constantly being updated with the most modern machines and technologies. The list of our machines are presented below.

- Hydraulic press brake Lg3, 2M/20mm
- Hydraulic guillotine shear Lg3, 2M/16mm
- Rolling machine with 3 rolls Lg3, 2M/20mm
- Hydraulic bender
- Combined punching machine
- Digitally controlled Plasma/ Oxy
- Manual Plasma Machine
- Drill press
- Disc chainsaw
- Band saw
- metal belt sander
- Automatic Welding Machine (Submerged Arc)
- Automatic Welding Machine (Tractor)
- Automatic Welding Machine (Submerged Arc)
- Welding station with coated electrodes
- Semi-automatic MIG-MAG welding station
- Portable TIG welding station 220V
- 5T overhead crane
- 2.5T forklift
- 6 bar air compressor

FAT (Factory Acceptance Test)

PGS can likewise perform a Factory Acceptance Test . For this, we provide the following :

- Testing and demonstration of the specific customer solution together with our customers.
- Finalization and evaluation of the technical specifications, processes and sequences.

We create a FAT protocol which is performed in-house by our technicians together with you.

We create all documentation and additional data carriers such as :

- FAT protocol
- Project documentation of the analyzer system
- Web meeting for a live discussion

Certifications and recognition
